Instructions:

Collaborate together and contribute to the solutions.

Guidelines:

When creating this list keep the follow 3 things in mind.

- ✓ *Consistency*. It is important the things that are being measured can be measured reliably.
- ✓ *Comprehensiveness*. It is important that list covers all the toxic indicators.
- ✓ *Frequency*. It is important that the measurements can be taken frequently enough so they can act as feedback.

Status:

1. No toxic impact
2. Mild toxic impact
3. Moderate toxic impact
4. Significant toxic impact
5. Significant damage to current generation
6. Significant damage to future generations
7. Significant damage to current and future generations
8. Impending catastrophe within 5 to 25 years
